

# SOUTHWEST FIRE SCIENCE CONSORTIUM

A JFSP KNOWLEDGE EXCHANGE CONSORTIUM

## What is the Southwest Fire Science Consortium?

The consortium is a way for managers, scientists, and policy makers to interact and share science. Our goal is to see the best science used to make management decisions and scientists working on the questions managers need answered. The Southwest is one of the most fire-dominated regions of the US, and the Consortium is the only regional organization focused on fire research and information dissemination across agency, administrative, and state boundaries. We bring together localized efforts to develop scientific information and to disseminate that to practitioners on the ground through an inclusive and open process. Please join us by attending a field trip or workshop, reading and sharing the materials on this website, and/or contributing to the fire conversation by submitting a proposal for an event or product.

**Submit an event proposal and let us put your ideas to work!**

## What can we do for you?

**Proposals:** We can put your idea to work by providing staff and funding to host a field trip, workshop, webinar, or other event. Propose an idea and we'll review it. Visit our website or contact us directly for proposal forms and/or tips!

**Travel Funding:** We provide travel grants to attend our events, to supplement tight travel budgets.

**Working Papers:** Is there a fire-related topic for which you lack sufficient current information? We produce syntheses of fire science to help address current management questions.

**Wildland Fire Lessons Learned Stories:** We typically fund two short videos per year. Is there something you feel should be covered?

**Updates and Events Listings:** Sign up for our mailing list or follow us on Twitter and stay up to date on training opportunities, recent publications, current events inside and outside the Consortium, receive a quarterly newsletter... Send your fire related event listing and we'll get the word out!

## UPCOMING EVENTS

### Webinars

"Effects of climate variability on thinning and watershed runoff," April 15th 1pm MDT/12pm AZ.

"Southwest Fire Season: 2014 Overview and 2015 Outlook," May 12th 1pm MDT/12pm AZ.

### Conferences

*6th International Fire Ecology and Management Congress: Advancing Ecology in Fire Management.* November 16-20, 2015. San Antonio, Texas, USA.

*Southwestern Fire Ecology and Management Conference.* November 2016, Tucson, AZ.
