Career Presentation

---

---

# Instructions

***(delete this slide before presentation)***

- ***Please start by downloading this file to your computer and "Save As" to your preferred location so you don't write over the template!***
- Add or delete slides to fit your presentation needs.
- The more photos/graphics the better. Feel free to add slides to include these and better tell your story visually. If desired, add your own photos/graphics to replace the placeholder photos already on the slides.
- Replace the bracketed, italicized text on each slide with your own words. For example, on slide 4 replace *[Job/Career Title]* with something like Engine Captain.
- Try to limit the number of words on each slide.
- Use the note section and relevant prompts on each slide to help guide you with suggested talking points and slide design.

# [Career Presentation Title]
